

Alien Meow

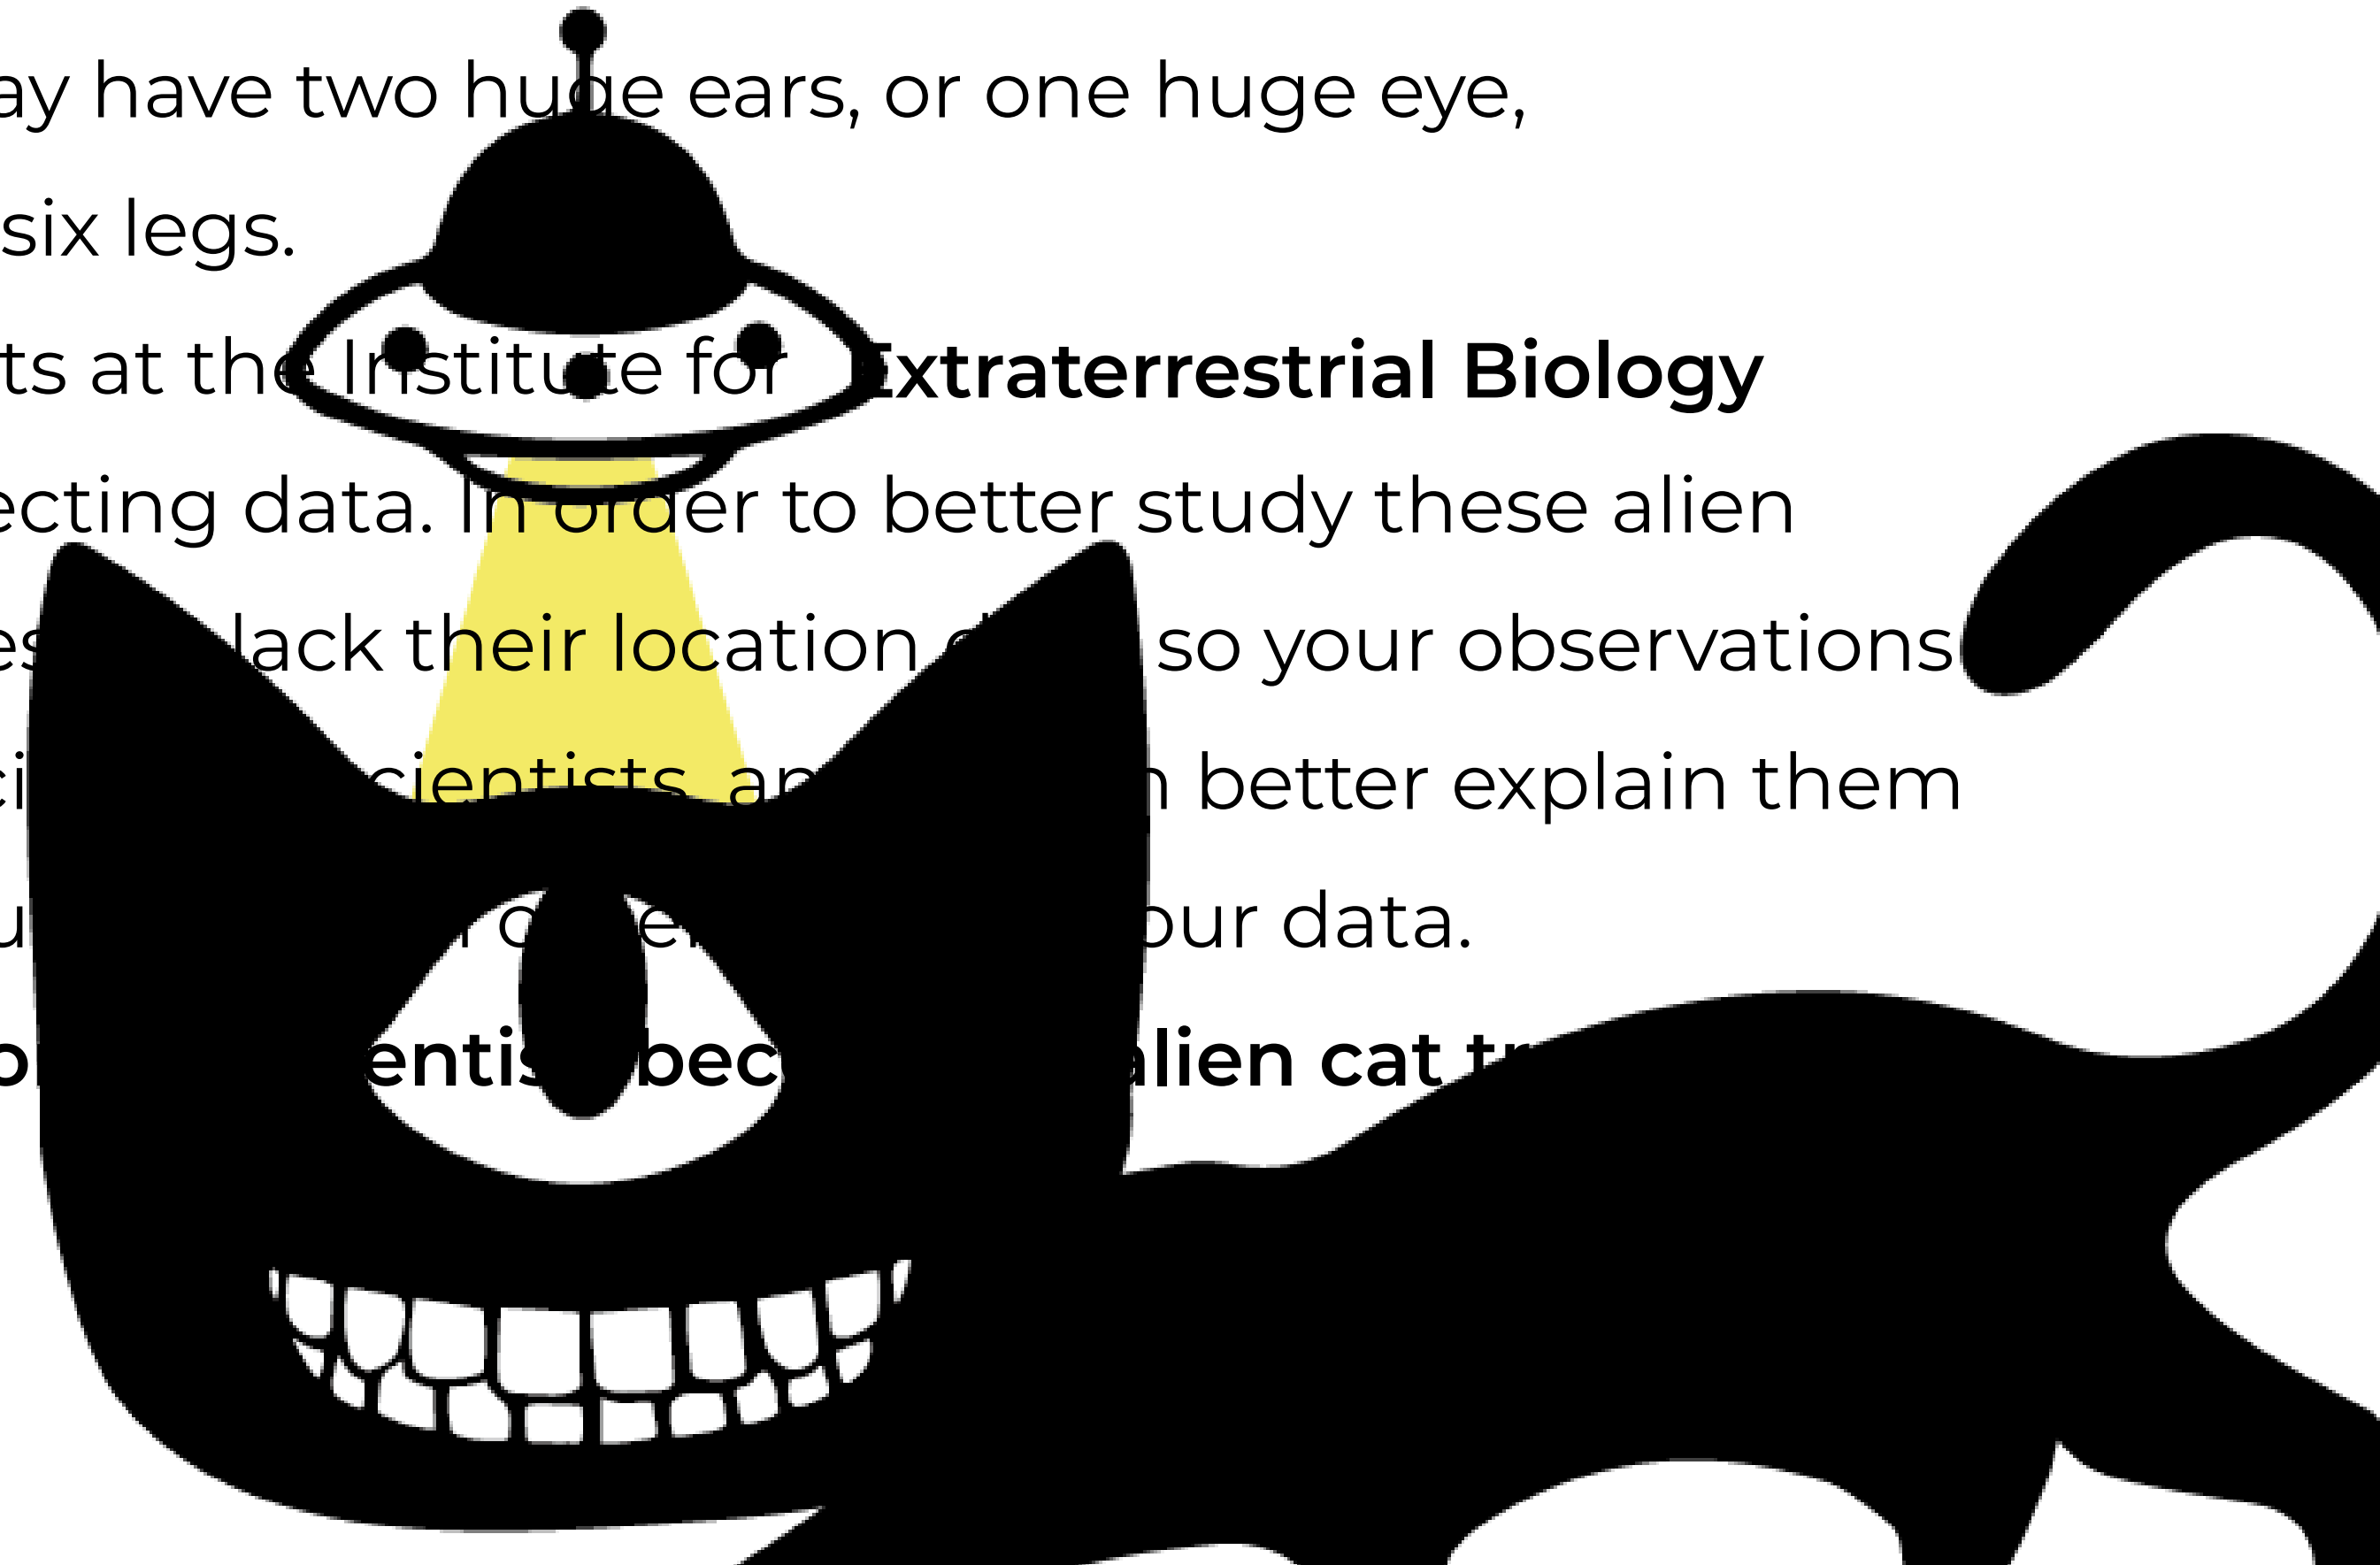

You Wen
WNM 617

Alien cat is an app for tracking **alien cats**.

alien cats refer to cats whose appearance is **different** from our common **domestic cats**, and even their behavior is different from usual. They may have two huge ears, or one huge eye, or have six legs.

Scientists at the Institute for **Extraterrestrial Biology** are collecting data. In order to better study these alien creatures, lack their location data, so your observations are crucial for scientists, and can better explain them with your data. So, help us collect our data.

So: become a scientist, become an alien cat tracker.
